GLOBAL ELECTRONICS

## talking excellence

Eurostar Global Electronics is an international, independent mobile phone distributor that was incorporated in January 2007.

We customise and ship mobile handsets from most manufacturers, to more than 35 countries.

Adding value to products, Eurostar Global undertake all aspects of bespoke handset customisation in-house, with a multitude of services ranging from language variant flashing to the supply of product literature.

A professional work ethic and dedicated management team with over 30 years combined experience in the mobile industry, has seen the company become an established entity and trusted partner in the marketplace.

Working with manufacturers, mobile and virtual network operators, authorised distributors, mass merchandisers, retailers and wholesale businesses, Eurostar Global assist key partners and add value throughout the supply chain, delivering complex product solutions in the mobile arena.

In addition to the international provision of wireless devices, Eurostar Global operate a technical department and a retail brand. These collectively supply a full turnkey solution to the domestic trade market and individual consumer.

We pride ourselves on being reliable and committed to delivering on our promises.

Reactive thinking and a proactive approach to exceeding expectations lies at the heart of our core values.

We believe that this flexibility and well balanced attitude to supporting the needs of customers and suppliers, allows us to maintain revenue streams while providing structured, cost-efficient solutions.

Our philosophy is a simple one; we aim to bring the right product, to the right market, at the right price.

Eurostar Global operate from a custom designed, state of the art warehouse geared to processing mobile phone products.

Independently sourcing, stocking and supplying the products of most major manufacturers, we are able to offer a wide range of choice to our customers at competitive prices, ready for immediate delivery.

Eurostar Global recognises that communication, pricing, delivery and availability are key components when looking for a supplier.

Through targeted and selected purchasing from our network of vendors, we procure products from businesses at all stages in the supply chain.

Our diverse and unique approach to sourcing products allows us to professionally cater for clients operating at all levels.

This range means Eurostar Global can accommodate volume orders for 'new to market' SIM Free handsets from a single OEM through to a bespoke, mixed pallet order comprising of multiple manufacturer lines.

At Eurostar Global Electronics  
our In-house technical division  
provides a competitive edge.

Our technical capabilities allow us to  
be both innovative and adaptable to our  
customers requirements. This enables us  
to provide products configured and ready  
to retail in any market you supply.

Alternatively, we can provide a quality  
approved mains adaptor.

Established relationships with world renowned carriers ensure the effective and safe delivery of products.

With customers in more than 35 countries, Eurostar Global has a proven domestic and international logistical expertise.

logistics

Working with some of the world's largest, most structured parcel and freight companies ensures the safe and prompt delivery of goods to their destination.

Eurostar Global is located in the centre of the UK, near to a major airport. With our secure vehicles, we are agile in our ability to respond and execute deliveries.

There are few businesses that can purchase goods today, process them and deliver to their customers worldwide tomorrow.

Paramount to a quality service, the internal communication within our business, relays important information down the chain to 'make things happen'.

## Warehousing

All products are IMEI / Serial tracked. The entire process for all goods through to despatch is monitored under CCTV.

Eurostar Global believe that having goods arrive on-time and intact is a priority. To secure our deliveries, we only ship goods that are securely packaged in suitable cartons or wooden crates. These are then stretch wrapped and banded for additional protection.
